EDUCATION

University of Toronto Sep 2026 – Dec 2027 (expected)
MSc in Applied Computing Toronto, ON
Coursework: Advanced Data Systems and Computational Linguistics

Queen Mary University of London Sep 2021 – Jul 2024
BSc in Computer Science, First Class Honours London, UK
Coursework: Neural Networks and Deep Learning, Bayesian Decision and Risk Analysis, and Automata and Formal Languages

EXPERIENCE

Tabula Lingua Nov 2024 – Sep 2026
Senior Product Research Analyst Remote (United States)
- Replaced the emotion engine's word lookup, which scored ~80% of words in a typical sentence as zero, with a TensorFlow regressor mapping ConceptNet Numberbatch embeddings (loaded via Gensim) to lexicon values, covering unseen and modern words and improving accuracy on far more sentences. Also added emoji parsing.
- Moved the engine, FastAPI REST API and Flask demo from hand-copied files on a development server to a GitHub repo with CI/CD and hosting via Coolify, adding OAuth2 and user management (Logto), API keys (Unkey) and custom usage analytics, so deploying became a single push.
- Deciphered and documented the undocumented legacy engine, then turned the notes into introductory presentations that gave staff their first working understanding of it, now intended for onboarding new hires.

Kearney Jun 2023 – Sep 2023
Management Consulting Intern India
- Produced market research, fuel-price analysis and industry outlook reports on LPG, LNG and CNG for heavy vehicles, used by senior consultants in client pitches for an energy company's sales-acceleration program.

Lockr Space Jun 2022 – Sep 2022
Web Design Intern (Micro-internship) United Kingdom
- Fixed and extended an eco-sportswear brand's Shopify storefront and plugins, improving site functionality.

Digi Investo Media Jun 2022 – Sep 2022
Web Developer (Freelance Intern) India
- Built a WordPress promotional blog for a home-remedies store, including a custom infinite-scroll plugin.
- Rebuilt the entire site from scratch in 2 days after it was corrupted one month into development.

PROJECTS

Automatic Labelling of Wideband RF Captures · Industry project with Qoherent Sep 2026 – Present
- Team project automatically labelling signals in wideband RF captures; early results improve on the baseline.

NES Game in 6502 Assembly 6502 ASM · YY-CHR · FamiTracker
- Experimental game written close to the NES hardware, with original pixel art and music.

Discord Game-Master Bot Python · Flask · discord.py
- Bot that runs online tabletop RPG sessions as a virtual game master; self-deployed on a custom cloud server.

Hackathons & Game Jams Unity · GameMaker · Java
- 1st and 2nd place at two school hackathons (one a self-sorting robotic dustbin concept); two 3-day Unity game jams; GameMaker and Java games.

SKILLS, AWARDS & INTERESTS

Languages	Python, Java, JavaScript, SQL, HTML/CSS, 6502 Assembly
ML & NLP	PyTorch, TensorFlow, scikit-learn, NLTK, Gensim, LangChain, OpenCV, YOLO, word embeddings
Data	NumPy, pandas, Matplotlib, MATLAB
Web & Infra	FastAPI, Flask, OAuth2, CI/CD, Coolify, GitHub, PostgreSQL, SQLite, WordPress, Shopify
Awards	Multiple Gold Awards, UK Mathematics Trust (UKMT) competitions (high school)
Interests	Piano (13 years, Trinity Grade 8) · Archery (local tournaments) · Rowing (university team)
